

Cyberbullying

Cyberbullying is when a child is tormented, threatened, harassed, humiliated, embarrassed or targeted by another child using the internet, interactive and digital technologies or mobile phones.

Plagiarism

Plagiarism is copying another person's ideas, words or writing and pretending that they are one's own work.

Search Engines

- A search engine is a web-based tool that enables users to locate information on the World Wide Web.
- These are programs that search an index of the world wide web for keywords and display the results in order.
- Search engines are a great way to find things on the web. If you search carefully you can find reliable and trustworthy information.
- Keywords are important when you search.
- If you use too few keywords you could get too many results and they won't all be relevant. However, if you use too many keywords, you might get no results at all.

Keywords	Description
Filter Content	Content filtering is the use of a program to screen and exclude from access or availability Web pages or e-mail that is deemed objectionable.
Copyright	A law that gives the owner of a work (like a book, movie, picture, song or web- site) the right to say how other people can use it.
Virus	A computer virus is a malicious soft- ware program loaded onto a computer without the user knowing. These can “infect” other programs on your computer.
Spyware	Software that can collect your pri- vate data without you knowing.

What is a Digital Citizen?

Being a **digital citizen means** you are a part of the group of people that use technology to communicate.

There are rules that you need to follow when you are a **digital citizen**, to protect yourself and to protect others.
